“Bonye” is a pure Korean word that refers to the bark of nuts.
PERIOD
Bonye identifies consumer’s need through market research, meaning customized product research and developing consumes a lot of time. Fabrications are conducted over three times with consumer’s testing, and products, made through a systematic and specialized process, increase consumer’s satisfaction.

DONATION
1% of Bonye’s total sales is donated to society. We are planning on a supporting a project on the Youth Training Institute where start-up youths can experience cosmetics manufacture / production / sale by the Bonye’s donation.

SEARCH
Bonye researches domestically quality plants, finding new material matters appliable in actual life so that develops products every two years.

Emphasizing the reliability with products consumers can trust by containing over 10% of natural substances
Fondness through commercializing popularized natural substances / Regular product development (every two-year)
Developing all-in-one complex functionality products containing a variety of functions
Using packages that have a combination of aesthetics, portability and are easy-to-use

In order to help your skin, that is polluted and tired out, become neat and healthy, the brand of Bonye specialized on ‘kind cosmetics’ is developing products under the moto of minimized chemicals through systematic and professional research allied with Keimyung Univ.

A all-in-one serum including skin, lotion and essence, whitening, wrinkle improvement, anti-pollution (blocks out fine dust)

Rosyella Whitening Cream
Rose water and 6 different types of wheat helps with stronger whitening, stronger whitening, stronger skin resilience

Hue Skin Cleansing Form
6 different types of grain extracts clear out the pores, removes dead skin cells, pores and fine dust

Rosy And Young AYANG Cream
Catch your wrinkles and nutrients at once with rose water and peptide, whitening, wrinkle improvement all-in-one cream
We assert to manufacture honest cosmetics true to fundamentals

With fine dust being an extreme social issue recently, people's consumption habits on skin care basic cosmetics are changing through the announcement of recent studies that fine dust negatively affects skin health. Especially with consumers finding for eco-friendly products are on the rise, the market for kind cosmetics made from natural ingredients is steadily growing.

The brand Bonye specialized on Kind cosmetics is continuing development and research to produce kind cosmetics that would satisfy customers.

The most important essence to making kind cosmetics is to 'be true to the basics.' Then bringing out the maximum effectiveness through carefully infusing base material components found in close nature is also important.

After long research and development, The brand Bonye specialized on Kind cosmetics succeeded in developing products that show superior regenerative effects on skin by using extracts from Moringa, also known as the miracle tree. All of Bonye contain at least 10% of natural extracts and we are continuously developing products that help consumers experience ideal effects.

The brand Bonye specialized on Kind cosmetics

**1. Purified water manufacturing process**
- Because the water put into cosmetics is absorbed by the skin, we only use purified water. It is a process for making purified water, which is very important.

**2. Semi-finished product manufacturing process**
- The process of purchasing raw materials for the product and mixing them in a blender to manufacture semi-finished products.

**3. Quality control (Q/C)**
- The process of checking the manufactured semi-finished products and determine whether they can be distributed through microbiological tests.

**4. Filling, packing process**
- This process includes filling received packages with the quality control accepted products. Then packaging shrinkage and outbox packing is processed for factory preparation.

**5. Release**
- Packaged products are checked again and shipped out once they are approved.
